## Overview — Singapore Dental Product Market

There are 1,506 registered dentists in the nation according to the Singapore Dental Council's 2010 annual report. The dentists to resident population ratio at 1 : 3,238 has remained range-bound in the past few years. The dentists are engaged in the following sectors:

National University of Singapore	38
Public service	14
Hospital sector	287
Private practice	1,021
Not in active practice	146

Like most developed nations, Singapore has a robust regulatory regime for the approval of medical devices. Administered by the Health Sciences Authority (HSA), the legislation requires all medical devices to be registered with the HSA before placing them on the market.

Singapore's per capita annual health expenditure is over US\$1,200 and the medical device market is valued at approximately US\$575 million. New health infrastructure and talent development initiatives are underway to continue this market growth.

Despite global economic uncertainty, it's an attractive market as Singapore's economy is growing strongly with an annual GDP rate above 5%.
