

Member Engagement Form — ADIA Vic Dental Chair Inst. Reference Group

The Australian Dental Industry Association (ADIA) provides member businesses the opportunity to play an active role in improving the regulatory environment in which dental products are supplied.

One area in which member businesses are currently working together is to revise the legal arrangements associated with the electrical regulatory requirements for the installation of dental chairs in Victoria. These are inconsistent with the requirements in other states / territories and are considered overly burdensome on business.

If you have an interest in this policy, we encourage you to become part of the *ADIA-VIC Dental Chair Installation Reference Group*. The purpose of the reference group is to allow you to contribute your views and experience on the following:

- Technical standards for the design, installation and maintenance of dental chairs;
- Regulatory standards for the installation of electrical equipment in dental surgeries;
- The practical problems associated with current Victorian government regulations regarding inspection of dental chair installations.
- Regulatory options that will reduce red tape associated with the installation of dental chairs in Victoria.

Most of the reference group's activity is undertaken via email and to provide an update from time to time a brief teleconference will be convened. The great thing is that you won't need to contribute a lot of time, around one hour per month; however, you will be contributing to important work that's reducing government red tape in Victoria.

There is no additional cost to ADIA member businesses wishing to participate in the *ADIA-VIC Dental Chair Installation Reference Group*. Simply complete this form and return it to ADIA at your convenience.
